

NOVEMBER 2018 ROUND UP

Congratulations to Sam Prezioso, PhD (Goldberg Lab) for successfully defending her dissertation, "Thermoregulation of Two *Pseudomonas aeruginosa* Virulence Factors"! She is heading to Harvard for a postdoc.

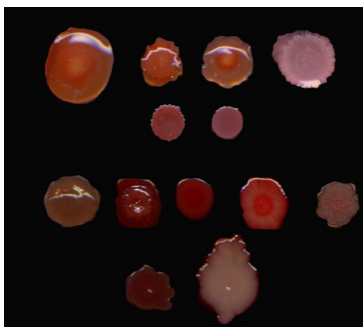

TRAINEE

Eric Sorscher, PhD was awarded a R01 titled "Rare Mutations in Cystic Fibrosis: Overcoming Barriers to Personalized Medicine" The project will investigate very rare CFTR variants in model systems such as pluripotent stem cells differentiated to an airway epithelial phenotype. Learn more about the grant [here](#).

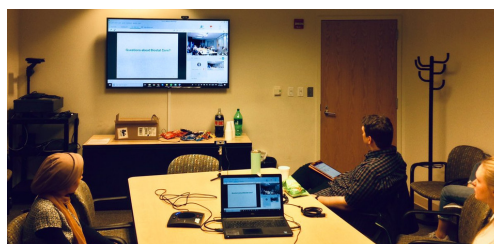

GRANT

Steve Diggle, PhD was awarded a CFF pilot to study how diversity within *Pseudomonas aeruginosa* populations impacts antimicrobial resistance. [Read more](#).

GRANT

CF-AIR Workshop streaming has been a success this fall semester, and will continue in spring 2019! See you 2nd and 4th Wednesdays in ECC 302 or IBB 1316!

WORKSHOP

The Marcus Foundation renewed support for 15 Emory University researchers, including Nael McCarty, PhD and Arlene Stecenko, MD, for their work in CF. Learn more [here](#).
