

MARCH 2019 ROUND UP

The Rada and Stecenko labs have a new paper in *Journal of Cystic Fibrosis*, "Systemic levels of anti-PAD4 autoantibodies correlate with airway obstruction in cystic fibrosis." Learn more [here](#).

ARTICLE

Congratulations to Ruxana Sadikot, David Guidot, Xian Fan, and Mike Koval for a new R01 from NHLBI: "How HIV-related proteins increase the susceptibility to lung injury despite anti-retroviral therapy." Learn more [here](#).

GRANT

Joanna Goldberg awarded a R21, "Regulation of *Pseudomonas aeruginosa* Virulence Gene Expression by Temperature." Learn more about the grant [here](#).

GRANT

Announcing the Data Integration and Biostatistics (DIB) Core! This core is an integral part of the RDP proposal submitted in February 2019, and is already launched. Headed by Sam Brown, PhD and Courtney McCracken, PhD, this core is preparing to supply multi-lab data support for CF researchers, including training and support for grant, manuscript, and abstract submission. Learn more on their [flyer](#).
